## *Jenny Mar*

### *SDSC*

- I intern under Dr. Mary Thomas at SDSC through the Research Experience for High School Students (REHS) program
- Helped compile an organized catalogue for the SDSC training Jupyter Notebooks examples repository, and developed basic Jupyter Notebook on learning python
- Final project: Image Classification between Butterflies and Bees using a Convolutional Neural Network
  - Adapted from a previous dogs vs cats classification CNN model

## *SDSC*

What I hope to accomplish:

- Learn more about machine learning and deep learning involved in data science and HPC systems
- Gain knowledge about parallel programming
- Interact with various hands-on materials and tutorials
