...data, as never before!

- Obstacles for collaborators
 - Not all team members have/want access to compute cluster(s)
 - Command line interface adds barriers for many users
- Results spread between different compute resources
 - Local computer, clusters, other file servers
- Recurring overhead with sharing
 - First download to local computer
 - Upload to file sharing service
- Alienation of data from its context
 - email body
 - email attachments

Each group develops an adhoc data sharing solution

- Build expertise and expend time on this rather than research
- Maintain and operate software and infrastructure
- Who should do this?
- How to sustain when key personnel leaves?

Data stumbling blocks

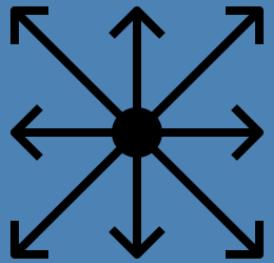

Access control

Collaboration

Storage

Transfer

Automation

Content dispersion

- Emails, meeting notes, protocols, parameters, etc.
- Lack of authoritative service to share data
- Scattered data is harder to manage and use well

Weak presentation

- Data presentation requires context to provide it depth and meaning

Dark data

- Without context, data becomes harder to find, use and reuse

Data shall be

1. Accessible on the web via Browser, API & Command line
2. Share-able with access control
3. Annotate-able with context & metadata
4. Presentable in a rich format

Over 80% of data movement (by number of files) on HPC systems is < 1MB

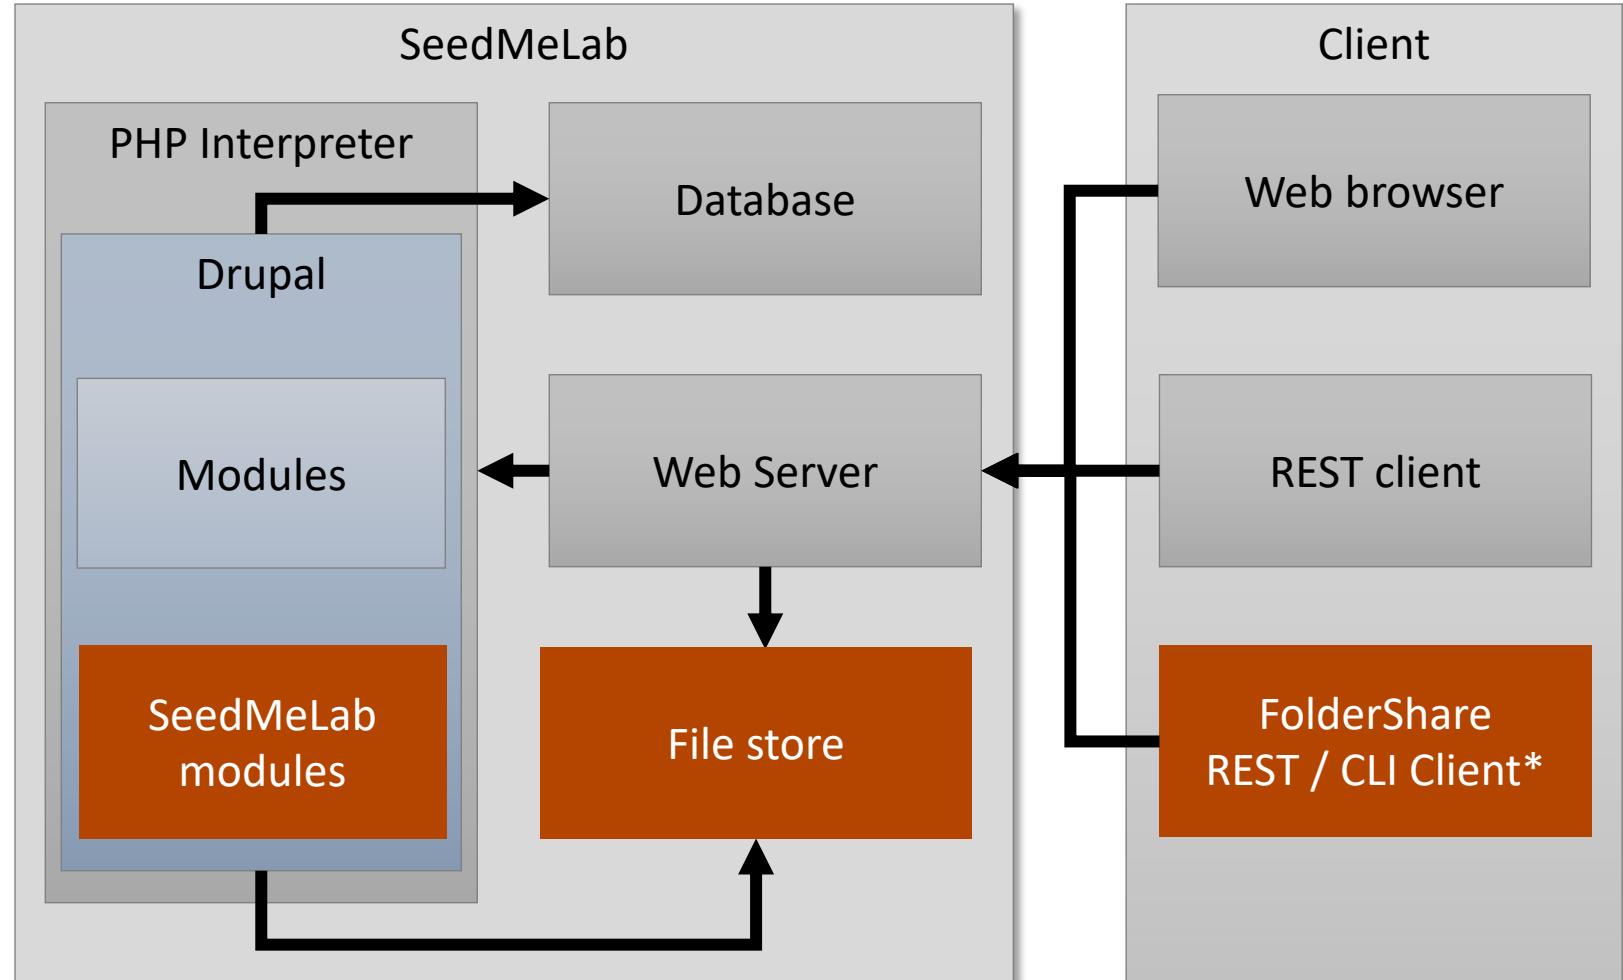

[Watch video: SeedMeLab overview](#)

SeedMeLab

Specialized modules for Drupal

- Data management
- REST service + client
- Visualization plugins
- Single sign-on

* FolderShare client for automation/scripting

Drupal

- Mature (Version 9)
- Battle tested
- Sustained (20 years)
- Extensive built-in features
- Community contributed modules (9,700+)
- 1+ Million active websites
- Open source (GPL2 License)

Community

- 4,000+ core contributors
- 46K Active contributors
- 1.4M users on drupal.org
- 1,000+ vendors
- Drupal security bug bounty €15,000 (Funded by EU-FOSS)

Content management

- Articles, blog entries, comments, forums, lists
- Deep customization for specific content
- Search (built-in and external)
- Caching, CSS & JS aggregation
- File upload, download, WYSIWYG editors
- Content rating, favorites lists, analytics

Account management

- Log in, reset password, request account
- Delete account, block account, email confirms
- User lists & profiles, user & site contact forms
- Password strength indicators, password policies
- Repeat password block, leaked password block
- CAPTCHA, LDAP, OAuth, 2FA

Site layout

- Primary & secondary menus, hierarchical menus
- Breadcrumbs, page & form layout, formatting
- Image, audio, & video management & display
- Regional settings, time zones, UI languages
- Vocabularies, RDF, RSS, meta tags, site maps
- Themes, responsive layouts

Security

- Log in flood control, log in history, failure logging
- Automatic account block after repeated failures
- IP address block, IP blacklist block
- User input filtering, SPAM filtering
- Role-based permissions, content access control

Long term benefits of building on Drupal framework

1. Easily usable, customizable and extensible
2. Deployable in turn-key fashion
3. Mature & sustainable
4. Supported by a large ecosystem
5. Open source & distributable

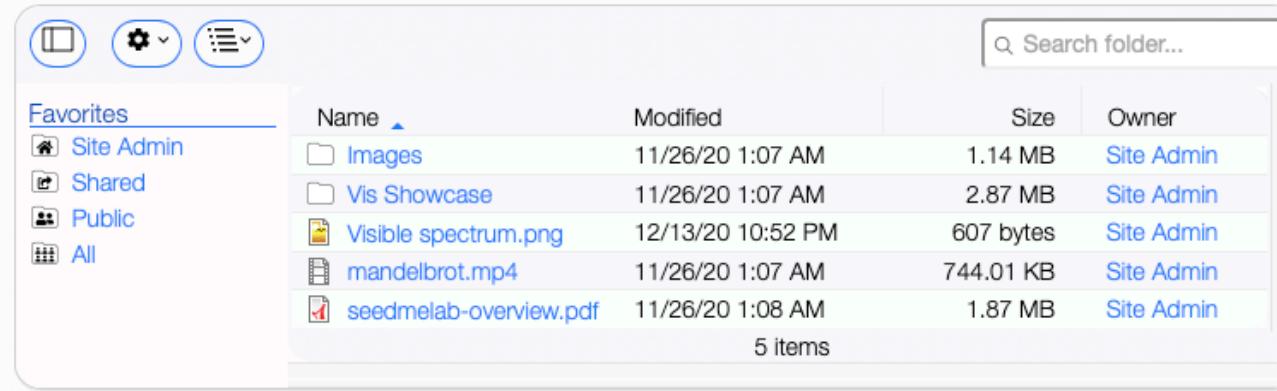

Data Management

Organize and manage data

Sample folder

Public content shared with everyone by you

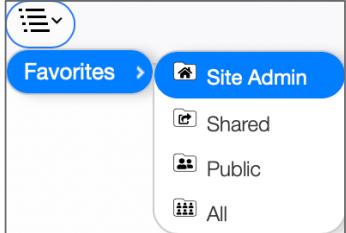

The screenshot shows a file manager interface with a sidebar on the left containing 'Favorites' links: Site Admin, Shared, Public, and All. The main area displays a list of files and folders with columns for Name, Modified, Size, and Owner. A search bar at the top right is labeled 'Search folder...'. The list includes:

Name	Modified	Size	Owner
Images	11/26/20 1:07 AM	1.14 MB	Site Admin
Vis Showcase	11/26/20 1:07 AM	2.87 MB	Site Admin

The [visible spectrum](#) is the portion of the electromagnetic spectrum that is visible to the human eye.

Properties of few colors in visible spectrum

Color	Wavelength	Frequency	Photon energy
Violet	380–450 nm	670–790 THz	2.75–3.26 eV
Blue	450–485 nm	620–670 THz	2.56–2.75 eV

Roots of quadratic equations

When $a \neq 0$, there are two solutions to $ax^2 + bx + c = 0$ and they are

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

- Add rich description to any file/folder with
- * Formatted text
 - * Link, list & table
 - * Images & videos
 - * Equations

Add custom metadata fields filesystem wide
e.g. Identifiers, dates, keywords, taxonomy, etc.

SeedMeLab

User Management

Built in

- User management
- User roles

Single Sign-On with addon modules

- Oauth2
- LDAP

Access Controls

Access grants on file/folder (set by user)

Adjust shared access to "Sample folder"

View access enables other users to view, copy, and download. Author access enables other users to edit, delete, move, and upload too.

User	None	View	Author
Everyone that can access this website	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Demo Guy	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
John Doe	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Users without View or Author access are automatically removed from this list when the form is saved.

User account name or email address:

Simplified sharing: Supported from top level only

User Role Based Permissions

Global role-based permissions (set by admin)

Permission	Anonymous user	Authenticated user	Site Manager	Administrator
FolderShare				
Administer files and folders	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Author files and folders	<input type="checkbox"/>	<input checked="" type="checkbox"/>		
Share files and folders with other users	<input type="checkbox"/>	<input checked="" type="checkbox"/>		
Share files and folders with the public	<input type="checkbox"/>	<input checked="" type="checkbox"/>		
View files and folders	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
FolderShare Invite				
Administer invitations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Use FolderShare invite operations	<input type="checkbox"/>	<input checked="" type="checkbox"/>		

Versatile Customization Capabilities

Customization options

- Add filesystem fields
- Add data list views
- Visualization plugins
- Processing plugins (validation, reports, ...)
- Layout
- Theme
- Branding

Automation

REST Client

- Client includes SDK (skip API as its complex)
- Command line utility

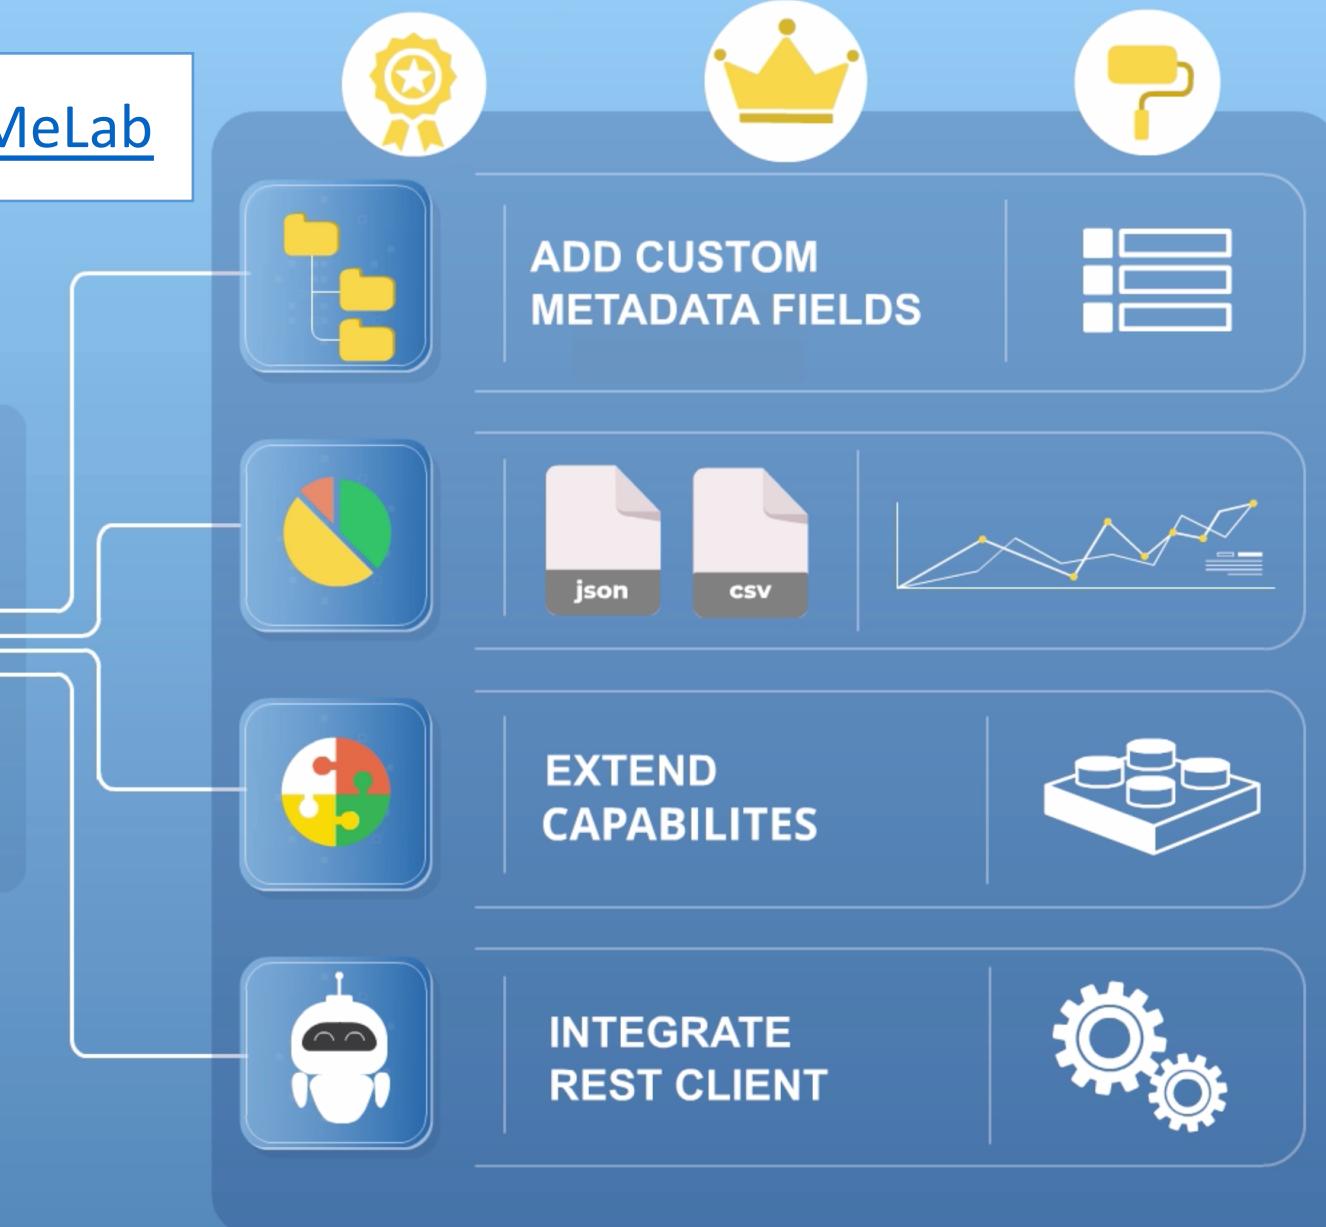

Demonstration
videos

Watch video: Managing data via REST client on SeedMeLab

```
$ foldershare --help
Usage is: foldershare [HOST_OPTIONS] [COMMAND] [OPTIONS]

Create, delete, change, and manage files and folders on a remote web site that uses the FolderShare module.

Commands
-----
chown          Change ownership on files and folders.
config         Show the host administrator configuration.
cp             Copy files and folders.
download       Download files and folders.
hostname       Show the current host name.
ls              List files and folders.
mkdir          Make new folders.
mv              Move files and folders.
rm              Remove files or folders.
rmdir          Remove empty folders.
stat           Show the status of files and folders.
update         Update fields on files and folders.
upload         Upload files and folders.
usage          Show the user's storage use.
version        Show version numbers.
wait           Wait until remote files and folders are enabled.
whoami         Show the current user name.
xattr          Get extended attributes of files and folders.
```

Research groups

- Use a branded data management system
 - Private collaboration
 - Public dissemination

Examples: Relativistic Laser Plasma Group (UCSD), Structural Engineering Group (UCSD),
Material Science Group (U Buffalo)

Gateways and scientific applications

- Integrate with existing systems
- Develop new applications

Examples: FlowGate portal (JCVI) , CIPRES Gateway (UCSD), GenApp Gateway (U Montana)

Service providers

- Customize and offer SeedMeLab to their users

Examples: HPCShare @ SDSC

SeedMeLab core modules are available at [Drupal.org](https://drupal.org/project/seedmelab)

<https://seedmelab.org/community>

Title	Active usage ¹
FolderShare	170
FolderShare REST	17
Formatter Suite	270
Chart Suite	78
CILogon Auth	12
Cache Utility	3
Grand total	550

¹Active usage is underreported, as many sites disable telemetry. Updated May 29, 2021

SeedMeLab Docker'ized recipe for technical adopters/evaluators
<https://github.com/sdsc/seedmelab>

Quotes

“My inbox is decongested... swift feedback to team ... easier to write research papers.”

- Alexey Arefiev, UC San Diego

“Fulfills user demand for data sharing ... easy integration with little development effort that leaves us time left over to focus on other opportunities.”

- Mark Miller, CIPRES project, UC San Diego

“Provides advanced file system to GenApp users and applications ... saving our team’s time to focus on other development priorities.”

- Emre Brookes, GenApp Framework, UT Health Science Center San Antonio

Accolade

Enabling researchers

- Proposals
 - Guidance/help on data management plan document
 - Letter of collaboration/commitment
- SeedMeLab instance for research groups
 - Host Rich data + Website (Optional)
 - Provide training
 - Customizations
- Development
 - Visualization plugins and extensions
 - Application integration

Users and integrators for their support & feedback.

Masters, undergraduate & high school interns
