# *Victoria Auerbach*
Scripps Institution of Oceanography, UCSD

- Geophysics PhD Student – studying large-scale geodynamic events (such as continental collisions) through numerical models

- How can we later apply Earth models to other planets (such as Venus)?

Pusok, A. and Kaus, B. (2015)

- Very new to modeling and using Expanse!

- Some of my personal goals for this week:

  ➢ Information about the expanse user portal, interactive nodes, slurm scripts, etc.

  ➢ Learn about MPI and Open MP

  ➢ General tips and tricks!

    ✓ Covered info regarding expanse, running jobs, *git*, and programming optimization!
